

# HAPPY KHOZA

JUNIOR AI / ML DEVELOPER

+27 81 758 8609 | HKHOZX@GMAIL.COM | Johannesburg, South Africa

Portfolio: potfolio-website-two.vercel.app | LinkedIn: linkedin.com/in/happy-khoza-47847a247 | GitHub: github.com/hxppyKhoza

## PROFESSIONAL SUMMARY

AI/ML developer specializing in natural language processing, computer vision, and full-stack AI applications. Proven ability to build and deploy production-ready intelligent systems. Strong foundation in software engineering combined with hands-on machine learning experience to deliver impactful, scalable solutions.

## AREAS OF EXPERTISE

- AI & Machine Learning: Python, NLP, Computer Vision, OpenAI API, TensorFlow, Scikit-learn, Prompt Engineering
- Full-Stack Development: JavaScript, Next.js, React, PHP, HTML, CSS, API Integration
- Data & Tools: SQL, Pandas, NumPy, Git, Streamlit, Vercel, Salesforce, Data Visualization
- Methodologies & Soft Skills: Agile/Scrum, problem-solving, technical communication, rapid prototyping

## PROFESSIONAL EXPERIENCE

### AI / ML Developer | CAPACITI Tech Career Accelerator (Oct 2025 – Dec 2025)

- Developed SentiScope Analytics, a real-time NLP sentiment analysis dashboard using Python, Streamlit, and OpenAI API.
- Engineered JCMS, an AI-powered smart city civic engagement platform using Next.js, geolocation APIs, and intelligent routing.
- Built MaizeGuard, a computer vision crop health detection tool using image classification for early disease diagnosis.
- Delivered additional AI solutions including an educational chatbot, ATS-optimized resume generator, and creative content generator.

### 1st & 2nd Line Helpdesk Technician | GAAP POS (Aug 2024 – Sep 2025)

- Provided technical support for POS systems, troubleshooting hardware and software issues.
- Configured network settings and managed software deployments via Salesforce.
- Improved response times by approximately 20% through efficient case management.

### Software Developer | Independent Projects (2024)

- Developed a full-stack e-commerce application with secure authentication and responsive UI/UX.
- Completed a Network Security Certification with hands-on cybersecurity training.

## EDUCATION & CERTIFICATIONS

### CAPACITI AI Bootcamp (Oct 2025 – Dec 2025)

Intensive 8-week program (100+ hours) with certifications in AI, machine learning, generative AI, and responsible AI.

### Bachelor of Science in Information Technology (Software Engineering)

Eduvos | NQF Level 7 | Feb 2022 – Dec 2024

## PROJECTS & PORTFOLIO

Live Applications: SentiScope (sentiment-dashboard777.streamlit.app) | JCMS (jcms-phi.vercel.app)  
GitHub portfolio showcasing AI/ML projects in NLP, computer vision, and full-stack development.
